

## IMPORTANT >>>> BE PATIENT

On average, you and your pet will notice results within 2-3 weeks. However, it can take up to a month in some pets. Please be patient. Try it for a full month or more. Use up all the tablets.

**Consistency is essential.** Give your pet FLEA TREATS every morning and every evening, either whole as a treat, or crushed and sprinkled into pet food.

### Daily Intake:

The table below is a beginning guideline for adult pets. Because FLEA TREATS are water soluble and nontoxic, you can safely adjust your pet's dosage for optimal results.

<u>WEIGHT</u>	<u>A.M.</u>	<u>P.M.</u>
0-29 lbs.	1 tablet	1 tablet
30-69lbs.	2 tablets	1 tablet
70+ lbs.	2+ tablets	2+ tablets

## SAFE, NATURAL AND EFFECTIVE!!!

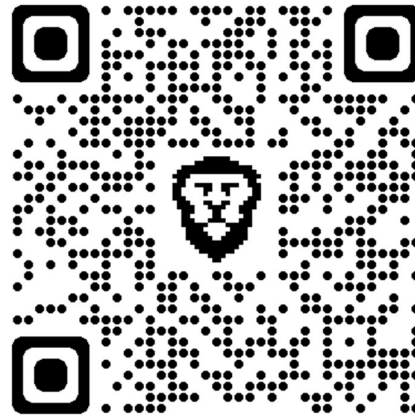

Flea Treats are great for **puppies, kittens, and pregnant and nursing dogs and cats.** Pregnant and lactating adults should follow the above guide with the addition of a mid-day dose.

Due to their smaller bladders and faster metabolism, **puppies and kittens require more frequent doses,** and can be given FLEA TREATS as soon as they are weaned:

<u>A.M.</u>	<u>MID-DAY</u>	<u>P.M.</u>
1 tablet	1 tablet	1 tablet

or Your Money Back**

# FLEA TREATS®

Flea Treats are tasty tablets flavored with  
REAL LIVER!

***Your pets will like them,  
fleas will not!***

The special formulation of B-complex vitamins in FLEA TREATS gradually causes your pet's skin to emit a powerful repellent, without the unpleasant and potentially harmful effects of insecticides. Neither you nor your pet can smell the repellent, but fleas can. At the same time, you'll support the health of your pet's skin and coat.

## ***Safe ingredients!***

FLEA TREATS are manufactured with USP Grade vitamins in a GMP Facility and are safe for all pets.

## **GUARANTEED**

### **SATISFACTION OR YOUR MONEY BACK!**

Our FLEA TREATS have been making pets and their humans happy since 1980, and we're proud to offer a 100% guaranty. If you're not completely satisfied, simply return the empty bottle to us for a full refund. Limit one refunded bottle per customer.

## ***Why choose FLEA TREATS instead of monthly drops or pills?***

FLEA TREATS are for people who have read the packages of flea drops, collars, sprays, powders, and dips, and have found that much of the print is WARNINGS!

FLEA TREATS are safe for young and older pets...even pregnant or nursing pets.

**Imagine: You're going on a camping trip.**  
You have three choices to avoid bug bites:

1. You can take a hormone pill once a month. Every female bug that bites you will be sterile, but not until *after* it bites!
2. You can apply insecticidal drops to the back of your neck, allow the insecticide to spread all over your body, and then hope that when the bugs land on you, the insecticide will kill them before they bite.
3. You can take a safe, tasty vitamin daily, and the bugs won't land on you at all.

**Which method would you choose? Which method do you think your pets would choose?**

## **Frequently Asked Questions**

1. ***Do they work?***  
YES! Given as directed, we guarantee the results!
2. ***Do I need to feed the FLEA TREATS every day?***  
Yes – Twice a Day Keeps the Fleas Away! Maintaining a constant level of B vitamin in your pet's system is essential. We make them with real liver – they taste so good your pet won't let you forget to give them their FLEA TREATS!
3. ***Do FLEA TREATS repel ticks?***  
Though we developed FLEA TREATS to repel fleas, many customers reported effectiveness against ticks as well. So much so, that in 1997 we extended our original satisfaction guaranty to include both fleas and ticks.
4. ***Can my pet overdose on FLEA TREATS?***  
No. Because B vitamins are water-soluble, whatever can't be metabolized flushes harmlessly through the pet's system.
5. ***My pet is under a veterinarian's care. Are FLEA TREATS safe?***  
FLEA TREATS are good for your pet and shouldn't interfere with any veterinary treatment, but it is always a good idea to ask your vet if you're unsure.
